Abstract

In this article, the role of young people in human society, the constitutional guarantees of their rights and freedoms, the work carried out by local state authorities and law enforcement agencies in the prevention of crime among young people, various propaganda activities, training them in the profession There was talk about training and orientation work.

Keywords: Constitution, youth, law enforcement agencies, rights and obligations of minors, preventive measures, cyber world, cyber security, monocenters, directing young people to professions

Introduction

Young people - we are the owners of the potential with a high level of power. We are the fundamental foundations of the future of the society. When people say that they are young people, they first of all think of young people, 3-4 years old, 5-6 years old. they imagine young children. But when we say youth, we should include not only representatives of this age group, but also persons under 30 years of age. Of course, today's topical issue is directly related to youth. Because we, the youth, are the people who perfect the country's today and tomorrow. A question arises here? To what extent are we young people able to use the opportunities that are being created for us? Are we spending our time on things that are right and related to our activities, and various similar questions are bothering all of us.

We cannot imagine almost all of our days without mobile communication tools or, if not, without the Internet, social networks, and the virtual world. difficult

times show that only the educational system alone cannot stand up to the existing moral threats. , not a kindergarten, school or institute, in most cases the following phone number is "educating". Unfortunately, this small phone is no longer a simple means of communication, it is often turning into a big weapon that promotes foreign ideology, a source that spreads the virus of violence, evil. is calling us all to be aware every day. One of the negative aspects of this is that the above-mentioned facts are becoming popular among young people. Earlier, adults used to tell us that we could not let our children into the house, but today, the opposite of this situation is observed. After all, today's youth are very attached to the virtual world. We can't imagine our life without them.

Methods

By our country's president Sh.M. Mirziyoyev ,, ... Globalization processes create new opportunities for humanity, but also unexpected problems. Threats and

dangers against national identity and moral values are increasing. Vices such as self-centeredness, light-hearted attitude to life, work, family, and consumerism are instilled in the minds of the population, especially young people who still cannot distinguish between black and white. Terrorism, extremism, The danger of threats such as transnational and cyber crime, human trafficking, drug trafficking is increasing more and more. The game draws a person into it step by step. As another example, we can take "Counter strike" and other similar virtual games. It is clear that every person has a question. These are the questions that many people ask, "Have you never played, are you white?" The general answer to all these questions is that virtual games, especially mobile devices, worsen our health and mental state. Nowadays, there are such cases that some of our mothers keep their young children busy with mobile communication devices, not with chores, until they finish household chores. There are many such realities in our life. Some parents have been giving their children various expensive mobile devices since they were young. But there is a very urgent question that bothers all of us. We have brought our child a cell phone to check his mental status. For what purpose is our child using the phone, at what age is he using it? Today, there are many situations, that is, some young people have become very angry, and they are quick to ride the horse of anger. After all, the social network is at least a mobile communication tool.

A few years ago, when we translated "blue whale" into Uzbek, the game "blue whale" became very popular all over the world. The game not only reached the whole world but also partially

entered our country. as long as he managed to come.

This game includes several stages. During the stages, a person draws the image of a whale on his body using various sharp-edged equipment, engages in various activities that weaken the human mental activity, throws a person from the top floor of a building, commits suicide. other tasks are assigned. Fortunately, the law enforcement agencies in our country took swift action against this situation. Various preventive measures were held in schools, colleges, especially in all educational institutions. As a result, crime among young people was prevented. must lead to the right goals.

Time is gold. Are we not getting the value of this gold? Time is passing by in quick pictures. How do we divide our time? Are we doing the activities we need? Have we set a clear goal for ourselves right now? Our teachers and coaches told us only one word about the goal when we were young, "Now is the time for you to study only and only. Who do you want to be early? If you waste your time without learning right now, one day you will go from house to house knocking on doors asking if there is any work to be done." looked very bad. If we saw them, we would have a very bad attitude. Now, we bow down to our heads and teachers, whom we hate, and we want to thank them a thousand times. thinking about our bright future today, they were very worried about us. They have taken the main place in our understanding of life. It should be noted that we need to plan our time properly. We need to create our own daily plan. In this, we will need to create our own "Time Management". Accordingly, I wake up at this time in the morning, eat breakfast at this time, study at this time, and do similar

things. we should focus on learning. Only then can we achieve our goal. Because a person who has learned knowledge will never be despised.

Results

To date, through the fair policies of our country's president, law enforcement agencies and enforcement agencies: the prosecutor's office, the state security service, internal affairs agencies, and other agencies have been conducting various propaganda campaigns in the regions. Some young people limit themselves to wasting their time. They do not understand the essence of the opportunities that are being created for them. In short, we do not know our rights and freedoms and our obligations. Such shortcomings are a great obstacle to our life. Another high attention of our head of state to the youth is training and orientation of the unemployed population, reducing poverty and ensuring employment of the population. That is, according to the decision, "Ishga Merhamat" monocenters will be established as an experiment under the Ministry of Employment and Labor Relations in 2019, and its first activity will be organized in Yashnabot district. According to the scope of activity, construction, domestic service, technical, service, automotive and other types of professions are taught in monocenters. The total number of professions is 22. The main reason for the increase in the number of monocenters today is the decision of our president on August 11, 2020, aimed at attracting the poor and unemployed population to entrepreneurship, increasing their labor activity and training them in the profession, and additional measures to ensure the employment of the population. the decision on activities was the main

support. At the same time, monocenters are providing their services to the population in 15 regions. As a result, many representatives of the population, especially young people, are employed.

Our legal capacity is established at birth. These norms are confirmed by the relevant normative legal documents.

"From birth to 30 years of age, a comprehensive and continuous system will be created that will support the child in every way and help him find a worthy place in life." .. The investment spent on bringing the young generation to maturity in all aspects will bring ten, hundred times more benefits to the society." These comments were emphasized by our country's President Shavkat Mirziyoyev and showed our high level of attention to the youth. It is not without reason that youth work agencies started working in order to listen to the problems of young people, their interests, suggestions and opinions. This is also a wide door of opportunities given to us young people by our president. Mayor's assistants for youth issues organized in the neighborhoods, the primary organization of the youth union and other official representatives. At this point, I would like to touch upon the activity of another law-enforcement state body, the State Security Service. This state body and its constituent structures, along with serving for the protection of our country, are studying the problems, suggestions and opinions of the future youth of our country. In particular, the state security service and its regional units are conducting various propaganda campaigns to prevent crime among unorganized youth, guide young people to the profession, and make good use of their free time. The state security service and youth work agencies for attracting young

people to work, depending on their interests, bring various work tools and equipment through concessions.

The constitutional guarantee of privileges is provided directly in Chapter 9, Article 42 of our constitution, "Everyone is guaranteed the freedom of scientific and technical creativity, the right to use cultural achievements." "The state takes care of the cultural, scientific and technical development of the society" has been strengthened, now through the additions to our constitution, Article 42 includes the following "scientific and technical" in the first part of Article 42. the words "scientific, technical and artistic" are being replaced by the words "scientific, technical and artistic" it creates conditions". Such benefits are a part of the continuous and integrated system that our head of state emphasized.

Discussion

In conclusion, it should be noted that we are the bright future of our country. Every attention paid to us means trust in us. We, the youth, should make good use of the wide opportunities that are being created for us. Because every time we have to

work on ourselves by using the time that is equal to gold effectively. We are the creators of the future.
